PROFILE SUMMARY

Computer Science Engineering student with strong practical experience in full-stack development, specializing in the MERN stack. Currently a Full Stack Developer Intern at Postulate Info Tech, contributing to real-world production projects. Skilled in building responsive UIs, developing RESTful APIs, and managing databases with MySQL and MongoDB. Successfully deployed three full-stack applications (frontend + backend) with optimized performance. Also developed an Android app for one of the projects. Motivated to grow as a Full Stack Developer and contribute to modern, scalable, and user-focused applications.

EXPERIENCE

Full Stack Developer Intern — Postulate Info Tech: June 2025 – Present (6 months)

- MERN development, REST APIs, MySQL, debugging

PROJECTS

SERVIFY - FREELANCE BIDDING PLATFORM (MINI PROJECT)

ROLE: FRONT-END DEVELOPER

- Tech Stack: MongoDB, Express.js, React.js, Node.js.
- Developed a real-time freelance bidding platform enabling clients to post projects and freelancers to place competitive bids.
- Built interactive dashboards and responsive product listings using React.js and CSS.
- Live Demo : <https://servify.zeabur.app>

BOLT & BROOK - E-COMMERCE WEBSITE (MERN STACK)

ROLE: FULL-STACK DEVELOPER (FRONTEND, BACKEND & DATABASE)

- Tech Stack: React.js, Node.js, Express.js, Tailwind CSS, MySQL, Razorpay (Test)
- Developed a full-stack e-commerce website for selling dresses with integrated Razorpay payment gateway (test mode).
- Implemented role-based login system (Admin & Customer) to control access to product management, orders, and user accounts.
- Designed a clean, mobile-friendly UI using Tailwind CSS for smooth shopping experience.
- Built backend APIs using Node.js and Express.js to handle user roles, product data, and orders with MySQL.

EXPENSE TRACKING SYSTEM

ROLE: FULL-STACK DEVELOPER (FRONTEND, BACKEND & DATABASE)

- Developed a full-stack Expense Tracker to simplify personal finance management by logging SMS-based transactions, loans, and salary data.
- Built Flask APIs to extract transaction amounts from SMS using regex, manage loans, and aggregate data.
- Designed responsive React UI with Tailwind CSS and visualized expenses using Recharts.
- Enabled dynamic filtering and real-time updates for seamless expense monitoring.
- Live Demo : <https://subash-s-66.github.io/expense-tracking-system>
