Github : github.com/Subash-S-66

Portfolio : subash-portfolio.zeabur.app

PROFESSIONAL SUMMARY

Full Stack Developer with 1 year of experience building scalable SaaS, automation, and cross-platform applications (web, APK, .exe). Skilled in Next.js, Node.js, and Python with hands-on experience in Azure, Docker, and CI/CD using GitHub Actions. Focused on system design, backend engineering, and delivering production-ready solutions.

PROJECTS

CLIP FORGE – AI YouTube Automation SaaS

JAN 2026 – Present

Tech Stack: Next.js, Node.js, MongoDB, Python, Redis, BullMQ, Azure, Docker

Live: <https://clipforgeapp.tech/>

- Built a full-stack SaaS platform to automate YouTube Shorts (text → script → video → upload)
- Designed multi-service architecture (Next.js, Express API, Python pipeline) for end-to-end automation
- Implemented Redis + BullMQ queues for job scheduling, retries, and distributed worker processing
- Developed pipeline for script, audio, subtitles, rendering, and YouTube upload with webhook tracking
- Built CI/CD pipelines using GitHub Actions for automated build, deployment, and service updates
- Built cross-platform apps as PWA, APK (Capacitor), and .exe with containerized builds
- Built subscription system with Razorpay, plan-based feature gating, and credit handling
- Supports parallel job execution using Redis queues

REAL-TIME ISL → TEXT SYSTEM (Final Year Project)

October 2025 – 2026

Tech Stack: React, FastAPI, MediaPipe, LSTM (ONNX), WebSocket, Docker, Azure

Live: <https://isl-final-year-project-frontend.delightfulbush-bd80c6.centralindia.azurecontainerapps.io/>

- Built a real-time sign language → text system using webcam streaming via WebSockets (~15 FPS)
- Extracted 263-dimensional hand + pose landmarks (MediaPipe) for gesture sequence modeling
- Implemented LSTM-based sequence model (ONNX) for accurate temporal gesture recognition
- Designed sliding window inference with stabilisation (voting, confidence filtering, debounce)
- Achieved low-latency (<250ms) with ~85% accuracy in real-time predictions

BOLT & BROOK – Full-Stack E-Commerce Platform

March 2025 – 2026

Tech Stack: React.js, Node.js, Express, MySQL, Docker

Live: <https://stage.boltandbrook.com/>

- Built a full-stack e-commerce platform with product catalog, cart, wishlist, and order management
- Implemented authentication system with role-based access (Admin, Customer, Guest)
- Developed Razorpay payment integration with order lifecycle, refunds, and invoice generation
- Designed inventory & batch management system with stock tracking and audit logs
- Built search, filtering, and recommendation flows for improved product discovery
- Integrated shipping, order tracking, returns, and review system for end-to-end commerce flow

EDUCATION

- DR.M.G.R. EDUCATIONAL AND RESEARCH INSTITUTE, CHENNAI
- Bachelor of Technology in Computer Science **2022 – 2026**

EXPERIENCE

- Full Stack Developer Intern — Postulate Info Tech
- Developed and maintained full-stack applications using MERN stack, built REST APIs, and optimized backend performance **June 2025 – April 2026**

SKILLS

- JavaScript, TypeScript, Python
- Next.js, React.js, Tailwind CSS
- Node.js, Express.js, FastAPI, REST APIs
- MongoDB, MySQL
- Docker, Azure, CI/CD (GitHub Actions)
- JWT, OAuth, Razorpay
- PWA, Capacitor (APK), .exe builds
